

Focus Base 422

Premium Sulfonate-Free Soluble Oil Emulsifier Package

Product Description

Focus Base 422 is a premium oil-soluble emulsifier package. It can be used to emulsify hydro-treated base oils like Group I and Group II oils. It is sodium sulfonate-free with a unique surfactant system. This base provides hard water-stable emulsions with excellent corrosion protection.

Applications

Focus Base 422 will make premium grade soluble oils. Typical treat rates are 15% - 20%.

Focus Base 422 was developed to emulsify Group II base oils; however, it is also an excellent emulsifier for naphthenic and paraffinic oils.

Package readily accepts chlorine and chlorine-free performance additives.

Benefits

- Excellent lubricity
- Excellent corrosion protection
- Hard water stable
- Excellent reserve alkalinity

Typical Properties

Feature	Data
Appearance	Clear amber liquid
Specific gravity @ 25°C	0.98
Acid number (mgKOH/g)	55
pH, 5% in DI water	9.1

Packaging

Packaging	Description	Net Wt.
Drums	55 gallon non-returnable	435 lbs
Totes	275 gallon non-returnable	2,175 lbs

Registration

USA	TSCA
Canada	DSL
