

Focus Ester PE 1800

Phosphorous Extreme Pressure/Anti-Wear Agent

Product Description

Focus Ester PE 1800 is an oil-soluble, high phosphorous-containing extreme pressure/anti-wear additive.

Applications

Focus Ester PE 1800 can be used as a component in industrial lubricants such as lubricating oils, greases, gear oils and synthetic lubricants. It can also be used in emulsifiable products like soluble oils and semi-synthetic fluids.

Focus Ester PE 1800 provides extreme pressure properties and functions as a friction modifier for drawing, stamping and rolling oils. Typical treat levels are 0.5% to 8.0%, depending upon the severity of the machining operation.

Focus Ester PE 1800 will provide excellent lubrication and improve corrosion protection.

Benefits

- High phosphorous content
- Excellent extreme pressure and lubricity
- Added corrosion protection

Typical Properties

Feature	Data
Appearance	Clear viscous amber liquid
Specific gravity @ 25C	1.01
Acid number (mg KOH/g)	341
% phosphorous	9.4
Viscosity (cst) @ 100C	175

Packaging

Packaging	Description	Net Wt.
Drums	55 gallon non-returnable	435 lbs
Totes	275 gallon non-returnable	2,175 lbs

Registration

USA	TSCA
Canada	DSL
