

Focus Sulfonate M

PRODUCT DESCRIPTION

Focus Sulfonate M is an oil-soluble, medium molecular weight, sodium sulfonate. **Focus Sulfonate M** will function as a primary emulsifier for formulating soluble oil and semi-synthetic fluids. It also provides inherent corrosion and rust inhibition properties, as well as outstanding dispersion and wetting properties.

BENEFITS

- Provides emulsification properties in soluble oils and semi-synthetic metalworking fluids
- Excellent corrosion and rust inhibition properties
- Outstanding dispersion and wetting properties of both solids and liquid solid systems

TYPICAL PROPERTIES

Feature	Unit	Standard Value
Appearance @ 25 °C	-	Dark amber liquid
Specific gravity @ 25 °C	-	1.0
Water content	%	5.0
pH, 1% aqueous	-	8.0
Viscosity @ 100 °C	cSt	100
Molecular weight (average)	-	465
Sulfonate content	%	60

PACKAGING

Packaging	Description	Net Weight
Drums	55-gallon non-returnable	440 lbs.
