

Focus Base 9

Product Description

Focus Base 9 is a high sulfonate-soluble oil emulsifier package designed to emulsify naphthenic oils with aniline points between 160°F and 180°F. Higher treat levels with **Focus Base 9** provide greater emulsification and rust protection under more demanding conditions. **Focus Base 9** provides good emulsion stability in both soft and hard waters. This product is compatible with extreme pressure additives used to formulate heavy duty soluble oils, like chlorinated paraffins, sulfurized products and esters.

Focus Base 9 does not contain chlorine, free sulfur, nitrites, phenols or heavy metals.

Performance Features

- Excellent emulsifier; provides good emulsion stability in soft to hard waters
- Provides great rust protection
- Offers good dispersion properties

Typical Properties

Feature	Data
Appearance	Amber liquid
Specific gravity @ 25C	1.0
Total acid value, (mgKOH/g)	12
% water	8.0
Viscosity (cst) @ 40C	360
5% pH in DI water	9.0

Packaging

Packaging	Description	Net Wt.
Drums	55 gallon non-returnable	450 lbs
Totes	275 gallon non-returnable	2,250 lbs

Registration

USA	TSCA
Canada	DSL
